

To optimize your crew's speed it is essential that they row in a boat that is designed for their weight. With a range of more than 55 different moulds, every crew can find the boat that better fits their needs.

F09 8+

The F09 boat has a wide cross section which allows both a low sinking and the development of high speed. This wide cross section also allows excellent roll stability.

The more the rowing technique concentrates the efforts close to the center of mass, the more the boat will allow the development of the strength and the best ratio between speed and stability.

It is the boat suitable for lightweight senior crews. Perfect for women and lightweight men's crews.

SPECIFICATIONS*

length:	16.5 m
width (water line):	58 cm
athletes weight range:	60-85 kg
athletes distance:	135 cm

RIGGER CONFIGURATIONS
