

Filippi

FILIPPI F13

To optimize your crew's speed it is essential that they row in a boat that is designed for their weight. With a range of more than 55 different moulds, almost every crew can find the boat that better fits their needs.

2x/2-

F13 (65-75 Kg; 9.40 m long)

F13 is the name of the most successful hull made in Filippi. It can be considered "the standard" for the 2x (double scull) boat class in pro rowing. A perfect choice for (male) athletes up to 75 Kg that are looking for a **fast** boat. The F13 hull is a little shorter than F46, shows a **straight** water line and **reduced vertical movements**. **Rounded cross section** and a medium level sideways stability make this boat a reliable product. Perfect for male rowers, it can also be used by women.
