

Filippi

FILIPPI F15

To optimize your crew's speed it is essential that they row in a boat that is designed for their weight. With a range of more than 55 different moulds, almost every crew can find the boat that better fits their needs.

1X SINGLE SCULLS F15

The F15 shows a straight bottom line which prevents the boat from vertical movements at the catch and finish, during the rowing stroke. This product features a U cross-section, similar to F45, and a stable floating attitude in the water.

The shell is 7.77 m long and well fits lightweight athletes into the range of 65 - 75 kg.
