

Filippi

FILIPPI F30

To optimize your crew's speed it is essential that they row in a boat that is designed for their weight. With a range of more than 55 different moulds, almost every crew can find the boat that better fits their needs.

2x/2-

F30 (75-85 Kg; 9.60 m long)

The F30 hull is longer than F13, with a lower (shallower) water line that increases boat sideways stability. Straight bottom line at stern and slightly "banana" shaped in the bow. This hull has a **U** cross section, wider to better adapt to female rowers too. A reliable product that can fit a large range of athletes and rowing skill levels.
