

# Filippi

# FILIPPI F54

To optimize your crew's speed it is essential that they row in a boat that is designed for their weight. With a range of more than 55 different moulds, almost every crew can find the boat that better fits their needs.

## 8+ EIGHT F54

The F54 shell is a perfect lightweight 8+ choice for both male and female rowers within the 60-70 kg weight range. This mould has been designed for professional light weight women, college and junior male athletes (physical characteristics and forces generated).

The hull is shorter and less wide than F42 and F9 while it shows a slight "banana" shaped keel line and a round cross section. Ergonomic improvements provide maximum crew comfort. Rowers will also appreciate how fast and manageable the boat can perform. Definitely the boat to choose for athletes up to 70 Kg with medium-high row skills.
