The Filippi trimaran is built according to the best quality standards appropriate for the shipyard's blazon.

Designed for inland waters and ideal for

following rowing boats or similar boats. The Filippi trimaran comfortably carries up to 4 people. It is equipped with 2 seats that rotate on an axis with ergonomic seat and outdoor cushion. The bridge is very large with a 1.67m x 2.75m walkable deck, which allows you to move easily even with a camera on board.

It is equipped with a protective edge

around the boat to be able to approach the docks without damage, equipped with 4 fenders and protective chains at the entrance, to allow easy entry for everyone (even for people with walking difficulties).

It's recommended the installation of a Suzuki long stem 20HP (max 25HP) 4-stroke engine. As the rudder is located at the stern of the boat, the engine must be blocked.
